TARGET AUDIENCE: This conference will be of particular interest and value to the faculty, staff, and students of the College of Public Health and the Health Science Colleges.

LEARNING OBJECTIVES:
At the conclusion of this seminar, the learner will be able to:
1. Define screening and recognize the implications of implementing screening programs
2. Describe criteria for selecting an appropriate disease for screening
3. Understand levels of evidence for evaluating the effectiveness of a screening program
4. Critically appraise lung cancer screening programs

DISCLOSURE STATEMENT: “I do not have any financial interests or other relationships with any manufacturers of products or providers of services I might be discussing in my presentation.”
