PhD Dissertation
“Influence of Preexisting Mental Illness and Medication Regimen Factors on Breast Cancer Endocrine Therapy Adherence”

Thursday, November 29th
11:30 am – 12:20 pm
Ellig Classroom (N120 CPHB)

Cole Haskins
MD/PhD Candidate
Department of Epidemiology
University of Iowa College of Public Health

TARGET AUDIENCE: This conference will be of particular interest and value to the faculty, staff, and students of the College of Public Health and the Health Science Colleges.

LEARNING OBJECTIVES:
At the conclusion of this seminar, the learner will be able to:
1. Describe the prevalence of preexisting mental illness in a cohort of SEER-Medicare ER+ breast cancer patients
2. Identify patients with specific mental illnesses at risk for endocrine therapy non-adherence
3. Describe the relationship between prior medication regimen factors and endocrine therapy adherence
4. Describe the impact of these factors in a subgroup of patients with mental illness

DISCLOSURE STATEMENT: “I do not have any financial interests or other relationships with any manufacturers of products or providers of services I might be discussing in my presentation.”
