After completing her Ph.D. in Genetics in the Department of Biology at the University of Iowa and a postdoc at University College Dublin, Dr. Sara Hanson is now an Assistant Professor at Colorado College. She will share the career decisions she has made that led to her current position, and the joys and challenges she has found in her teaching and research at a small liberal arts college.

Following the presentation there will be a Q&A session
Pizza and beverages will be provided

The iBio program is dedicated to student success and this includes all career options available to graduates of our programs. The iBio Career Options Lunch Talk will be held each semester and will provide students with exposure to a wide variety of successful people who will share the story of their science-related career paths in a friendly, informal lunchtime setting. All are welcome.

Immediately following
Sara will be The rEvolutionary Research Club speaker: “Evolution of Yeast Mating-Type Switching”
