In a special event co-sponsored with The Iowa Neuroscience Institute, 

ELI GOTTLIEB

will read from his novel

Best Boy

“Amid the flood of books about autism in childhood comes this gripping novel about the fresher territory of autism in midlife. It is written with elan, wit, and great empathy, and it limns in fiction the crisis our nation faces in real life as we try to construct viable supports for this burgeoning population.”

—Andrew Solomon
